26” (660mm) Mechanical Hexagonal Crimper For 6-120mm² Tube Terminals

The D03013 is a Heavy-duty hexagonal crimping tool to accommodate the crimping of copper lugs and tubes in the range 6mm² - 120mm².
The tool is able to accommodate a wide range of sizes due to two rotating rings within the head; these rings are clearly marked with the respective size and lock into position..

- Quick and easy Hex size selection.
- Leverage action steel frame.
- Tubular handles with PVC grips.
- Works on copper and aluminium cable lug terminals and tubes.
- Hexagonal central crimp force ensures consistent and firm connection with cable.
- Spring loaded locking pin allows rotation selection for the desired crimp size.
- Embossed gauge code on jaws for identification of the crimp size.

Length: 26” (660mm) Weight: 3.66kg
