Novopro SDX / DJ Booth Podium Shelves (pair)

These add-on podium shelf plates are designed for moving heads, lighting effects or monitor speakers to be placed on the Novopro SDX booth (or other booths that are manufactured from 1" / 25mm box section framework) maximising your working space and not having the expense of separate podium stands.

The podium shelves give a 25cm high platform that has a 20cm x 20cm plate with 5 x pre-drilled holes to enable a secure mounting point for your product.

Supplied with foam pads or they can be mounted onto tape that has been wrapped around your booth/stand, the Novopro podium shelves make a very effective and versatile stand solution for your DJ Booth.
