EXTENSION LEAD
WITH IEC 60309 PLUG

⚠ IMPORTANT PRODUCT SAFETY INFORMATION ⚠

- ✓ DO confirm the electrical safety of any large domestic or high power devices you may wish to connect that they are approved for use with an extension cord. If in doubt do not use.
- ✓ DO ensure the mains cable must be fully unwound before use.
- ✓ DO position an extension lead carefully to prevent any risk of damage or a trip hazard, If the cable has to cross a pathway, cover it with a rubber protector strip.
- ✓ DO check that the extension cable is suitable for your local mains voltage and socket.
- ✓ DO check that plugs and sockets are undamaged before use and the cable is not damaged, due to being walked over, continually bent at the same point or stored badly.

- ✗ DO NOT remove the IEC plug and connect directly to a mains supply.
- ✗ DO NOT use extension cables with multi-way adapters or adapter blocks as this can overload the socket which increases the risk a fire.
- ✗ DO NOT connect multiple extension leads together. DO NOT exceed the total maximum load across all outlets of 13A / 3120W.
- ✗ DO NOT push objects other than the appliance plug into the extension cables socket
- ✗ DO NOT use in damp conditions.
- ✗ DO NOT use outdoors - for indoor use only.

RECOMMENDED USAGE

- ✓ Connect the devices you require to power to the outlet socket.
- ✓ Connect the IEC plug to a mains supply (eg a UPS power strip) and turn on the power.
