Cyntech Touch4Pi - Raspberry Pi HAT

Enhance your physical computing experience with the addition of 4 labelled capacitive touch pads, along with 4 RGB LEDs.

The LEDs are placed to shine in to the sides of the touch panel so interactive games and projects can be created in a number of programming languages such as Scratch and Python. The Touch4Pi can also be used as a joystick in addition to a game controlled on the screen.

The Touch4Pi is fully HAT compliant, featuring HAT size to fit straight on to the Raspberry Pi.

General Specifications

Input Voltage	5v
Input Current	300mA max
Size	66x57x13mm (W x D x H)
Net weight	25g

Operation Specifications

		Min	Typ	Max
Operating Temperature:		-10c		60c
Storage Temperature:		-25c		80c
Relative humidity:		5%		95%
