KAUDEN™

Item code – SX7203CL
KAUDEN™ Brush Module 25x50mm –White Frame/Transparent White finish Brush bristles

- Hide unsightly Audio cables and ideal for decorative finish Faceplates (Steel, Brass etc.)
- Simply snaps in to most faceplates with a 25x50mm aperture
- Easy to fit
- for a neater cleaner appearance
- UL94V0 Flame Retardant Frame

Brush Modules simply snap into any Data type faceplate and are commonly used to hide Audio Visual cables behind walls and so giving a clean appearance to your home rather than bundles of wires hanging down the wall or trailing around in the living room. Two plates are usually installed, one for entrance and the other for the exit of cables. Commonly these are at the top and bottom of the wall where the equipment resides.

NOTE: They are meant to stand alone in their own faceplate and not intended for use alongside other modules in the same faceplate or alongside other wall sockets in the same channel where hazardous voltages may be accessible through the Brush Module.
