Non-Mount Appliances

Looking to mount yournon 19-inch mountableappliances into LMS Dataenclosures?

The new range of L-Support Rails allow mounting of common equipment and appliance products including compatible CCTV, networking, peripherals and server devices directly into the enclosure. Manufactured of high-grade, powder coated steel as a set of two rails, they have an approximate load capacity upto 40kg. The L-Rails not only have an exact 90-degree shape but also feature both direct and 'slotted' cage holes so precise fitment can be assured* Offered in three depths to fit cabinets up to around 1000mm deep, the kits are ideal for most of the LMS Data EcoNetCab family of enclosures, both general networking and of course server types.
