USB
Antimicrobial USB Cable

Our range of antibacterial cables use a new technology, developed by adding antimicrobial powder, which gives plastic surfaces a bacteria-killing property and can, when used in hospitals and laboratory, contribute to raising the standard of hygiene and to minimising the risk of infection.

Specification
- **Length:** 1 or 2m
- **Bandwidth:** 480Mbps
- **Power Delivery:** 5v, 0.5a
- USB-A to Micro-B
- Antimicrobial Surface
