Fibre Optic Cabling
Break Out Boxes

The Fibrefox range of wall mountable break out boxes are designed to provide a cost effective method of patching or splicing in situations where equipment racks or cabinets are not available.

The break out boxes are available in tough and lightweight ABS or mild steel for more demanding situations.

The boxes can be supplied fully loaded with all common adaptors including LC, SC, ST, SMA, FC, FDDI and ESCON types. They are supplied in a number of popular formats including 1 in/1 out, 1 in/2 out and 2 in/2 out. We provide a custom machining service enabling us to supply any other splice box configuration or hybrid enclosures on very short lead times.

All enclosures are offered with full fibre/splice management kit options and are available from stock.

Features and Benefits

- Tough construction
- Patch, splice or hybrid versions
- Wall mountable
- Available with fibre/splice management kits
- Custom machining service
- Stock availability
