Category 5e SPEEDY RJ45 Plugs:

Category 5e Contractor Grade SPEEDY RJ45 Plug (PXSPDY5b): plugs are designed to simplify twisted pair terminations by allowing the wire pairs to be easily inserted through the plug and out of the front. This allows the installer to easily check the wiring order before crimping the connector. Twist is maintained more easily enabling a better performing crimp. Waste is minimised and the plugs are suitable for either stranded or solid wires.

Features:

- Each plug allows twisted pair wires to be inserted through the body and pulled out of the front to ensure the correct wiring order before crimping
- By pulling the cores into the plug, twists can easily be maintained up to the contacts, enabling fully rated terminations compliant with the patch cord standard TIA-568-C.2
- Three prong pin fits stranded or solid cores 23 – 26 AWG, with insulation OD 0.93 –1.04mm
- Suitable for termination of UTP cables with sheath O.D. of 5.0 – 6.0mm
- Perfect solution for rapid termination
- Simple one-piece design
- Less cable scrap and wastage
- **N.B. Must be used with suitable crimp tool (e.g., our code TRCSPDY or TRCSPDY4)**
