SOCKET & SEE TECC40 LARGE INSTRUMENT CARRY CASE

The Socket & See TECC40 Large Instrument Carry Case is the ideal solution for professionals needing to transport their testing instruments safely. This case is built to endure, featuring a hard-wearing, durable structure that includes padding to safeguard your instruments when they're not in use. The design accommodates a wide array of devices such as single function testers, multi-meters, and clamp meters, ensuring that each piece of equipment sits securely in its place.

Organised and Accessible

Divided into four distinct compartments, the TECC40 ensures that all instruments and accessories remain organized and easy to retrieve. The case is designed to open fully, thanks to its twin zips, which can also be secured with a small padlock for added security. An internal pocket is thoughtfully included to store manuals, datasheets, and calibration certificates, keeping them readily available for on-site consultations.
