Models may vary from the image shown

Protective filter for clear voice recordings with CHERRY UM microphones

A pop filter is essential to reduce plosive sounds when pronouncing words with P, T or K, for example. The CHERRY UM POP FILTER helps you to not only spend less time and effort in the post-production of audio recordings, but also protects the capsule of the microphone from moisture caused by saliva, keeping it intact for longer.

The CHERRY UM POP FILTER was designed to meet the exact requirements of the CHERRY UM MIC SERIES (CHERRY UM 3.0, CHERRY UM 6.0 ADVANCED, CHERRY UM 9.0 PRO RGB) and can therefore be attached without any problem to any of the three microphones: Simply attach it between the microphone and the stand and tighten with the help of a small knob – and you're ready to start recording. The sleek design does not detract from the elegant look of the microphone.

The most important advantages

- Filters out plosive sounds that are noticeable as pops or hisses when pronouncing letters such as P, T, and K
- Less post-production of recordings required
- Perfect supplement to the USB microphones in the CHERRY UM MIC SERIES
- Assembly is child's play: Simply tighten using a small knob
- Protects the microphone capsule from moisture, thereby ensuring a longer service life

Technical specifications

Housing color:
Black

Weight (product):
POP filter: approx. 27 g

Total weight (with packaging):
approx. 73 g

Storage temperature:
–5 °C to 55 °C, max. 85% humidity

Operating temperature:
0 °C to 50 °C, max. 85% humidity

Scope of delivery:
- UM POP FILTER

Product dimensions:
POP FILTER: 95 x 88 x 150 mm

Packaging dimensions:
approx. 156 x 88 x 98 mm

Packaging unit:
Number of products in outer package 40
Number of outer packages per palette: 10

Errors, technical changes and delivery possibilities excepted. Technical information refers only to the specifications of the products. Features may differ from the information provided.
