

Raised floor boxes

- 4 compartment options
- 4 & 6-way 6C data plates
- Accessory plate options
- Tough galvanised steel lid
- 2 and 3 socket options
- 80mm deep
- 20mm & 25mm knockouts
- 30mm plug top clearance

Raised floor boxes are used to connect the sub-floor to the desk via the raised floor itself, power and data are separated into compartments and fed out under a purpose-built lid.

Floor Boxes can be ordered pre-loaded or empty to suit each application.
