TRAYS > STANDARD TRAYS

STANDARD DEEP TRAY

PRODUCT CODE: F02

The iconic Gratnells school tray is fully recyclable, BSI approved for heavy educational use, and seamlessly integrates with standard school furniture. Available in 4 heights and a range of colours

Key features

- BSI tested and passed for heavy educational use
- Fully recyclable
- All Gratnells Standard trays fit standard school furniture
- Lids and inserts available
- Scratch resistant
- Available in a range of standard colours
- Anti-static additive – protection from dust contamination
- Anti-fade colour protector

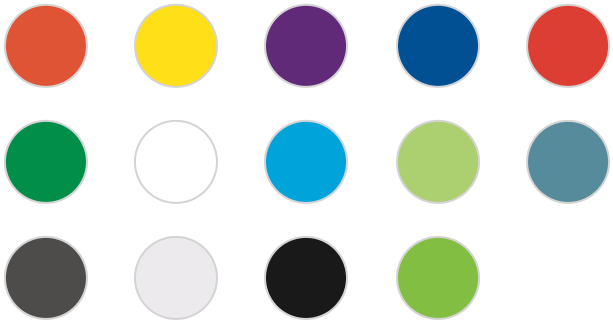

Dimensions and specification

Tray dimensions (mm)	H 150 x W 312 x D 427
Delivery method	Pallet, Euro Pallet, Parcel
Product weight	0.92
Pack Size	160

Educational benefits

- When conducting a mini-experiment or demonstration, the tray safely keeps all chemicals contained and prevents contamination of the work surface.
- Useful for storing chemicals on shelving ensuring any leakages are contained.
- Students can select pre-prepared resources from trays, taking responsibility for their learning
- Equipment can be sorted and transported around the learning space with ease, preventing lost learning time.
- Chemically unreactive polypropylene & Semi fire-retardant at 0.22mm per min

Tray colors

There are 14 best seller colours availabe in packs of 6 but trays also are available in other exciting and stimulating colours.

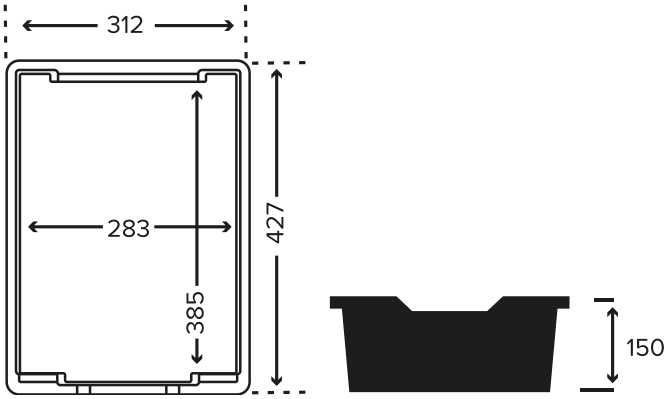

We even have trays to match the national curriculum colours, so there's a tray to complement every classroom. Whether it is chemicals, worksheets, stationery, or robotics kits that need housing, a Gratnells tray is the solution.

About the product

The iconic, Worldwide award-winning Gratnells school tray is found in learning environments all over the world. Made from fully recyclable polypropylene, it is moulded to a standardised size for seamless fusion with standard school furniture. The strong rigid tray, which is loved by teachers and technicians is BSI approved for heavy educational use. The talc filled polypropylene makes our tray chemically resistant to more chemicals than other similar storage trays on the market made from ABS. This feature, in addition to it being semi fire-retardant at 0.22mm per minute, makes the Gratnells tray perfect carrying out science activities safely and has made it a staple item in many laboratories and prep rooms over the past 50 years. It even has the added benefit of an anti-static additive in the polypropylene to reduce the attraction of dust. The ease with which the tray can be moved around a learning space and swapped in or out of standardised units cannot be understated. It was designed to help provide a flexible, high-density storage solution on a small footprint, allowing more space to be kept available for learning activities. The tray comes in a range of colours for visually stimulating, colour-coded storage and is easily accessible to learners due to its trademarked shape of design. Whether it is chemicals, worksheets, stationery, or robotics kits that need housing, a Gratnells tray is the solution.
